About This Game

Lake Ridden is a story-driven, first-person puzzle game! A cozy supernatural adventure where you unravel a mysterious past, trying to find your sister. Luckily, you are not alone...

You are Marie, a 13-year-old girl and the year is 1988. The warm summer is giving way to the first signs of autumn. Reluctantly, you join your younger sister and her friends for one last camping weekend in the wilderness of Maine. It was going just great, but the second night by the sizzling campfire, an argument with your sister ended with her running off into the forest. While searching for her, you stumble upon an old forgotten estate.

To solve the mystery, and ultimately find your sister, you must investigate for clues, solve tricky puzzles and communicate with former residents!

Probably the lamest DLC investigation, but it unlocks the Khorne tarot which means I can purge Khorne forever and ever and ever and ever and ever and ever and ever and- . Dear god, the controls and steering are horrible. Always feels like you're out of control.. I love the crafting system.. A great mix between Ruiner, Smash TV, One Finger Death Punch with a bit of Kill Bill sprinkled on top. Deceptively simple and responsive controls mean that although the difficulty can ramp up, death is always down to your own obvious mistake which reduces any rage-inducing moments. So much fast, pure addictive gameplay for the price with no messing about with reloading or in a maze of menus between runs. Looking forward to spending a lot more time trying to master this one. Also, best of luck in having, "Just one more go" not turn into 10!. If you love games like Cake mania and diner dash you'll get a kick out of this.

I took a Marvellous journey to the Marvellous Machine of my Mind. It was Wonderful, Relaxing and Beautiful. Thank you. i get motion sickness but its a huge rush i love it thanks for mking this .. Well, if you are a pro in racing games... you still won't win in a while.

This game is quite good for a bad game.

I recommend this game if you like bad games.

Once you get used to turning left or right, you may try to play it.

Luck you can go to the next level even if you finished last. The game looks like it's a port of an unfinished mobile game.

I got it free, now I want my time back. Buy this if you collect bad games. If this is the third I wonder how the previous ones are like.

Pros: - You can lower or mute sounds in menu.

- It has menu.

- Unlike other games in racing genre, your vechile is already a wreck before you even start the race. I thought it's a fun ironic thing next to the game.

- You won't notice the graphics because of it's playability.

Cons: - Don't let your children or cat play this thing. Seriously. Don't.

- If I'd make a game like this it wouldn't ever be greenlit here in steam.

- Uncontrollable car.

Summary:

- IGN 10/gogolplex - Would mute music again. -. I want to play this game but it's only in japanese voiceover. When will they release the english voiceover for this game?. This is one of those games which gets a free pass based on its artistic style. In this game you need to get some funky looking creatures through a black-light forest by using each of their special abilities. It would be nice if there was a two-player option, which I can't believe they didn't put in. CreaVures is nice enough that I was happy to put up with having to switch between two active creatures, making me feel like I was going back and forth quite frequently to accomplish the task at hand. Would I still buy it if I had the chance to reconsider? Of course. CreaVures looks awesome.. Started a new game, pushed a single key, and then it crashed.

The game menus look like they were created by animating screenshots of a hypothetical Android version of this game.... confusing layout, big buttons with only icons, blurry, etc. Additionally, none of the them have any text at all to explain what it is that you're clicking so it's a bit confusing to navigate. And almost all the text in the game looks blurry from what I've seen.. Good concept, but needs development.

In my opinion, this game would be much more enjoyable with:

- Proper height adjustment of the instructor > punches that should be directed to my face are hitting my body, making it extremely difficult to dodge

- More menus for choosing exercises

- More difficulty levels

I also feel that the price point should be lowered given the depth of this game.
